Google SketchUp
Carto with SQL

ANALOGUE

Machine and Hand Joinery
(Wood)
Hand Drafting & Drawing
Model making

ABOUT ME I have enjoyed contributing to projects which are contextually driven and have a social, political as well as economical impact on the built environment. Through my education and experience, I try to engage at different scales - by dealing with intangible social and urban issues and also by diving into details to resolve each nut and bolt to execute a project. This attracted me to Carnegie Mellon University where I worked with Prof. John Folan, Urban Design Build Studio and Prof. Stefan Gruber on various projects that have helped me enhance my skill sets as an architect, urbanist and a social thinker.
